

Water Services Division

W A Fairhurst & Partners is a leading engineering and environmental consultancy with an in-house workforce of over **three hundred and twenty staff**. We currently operate from twelve regional offices in the UK including **eight offices** in Scotland.

Fairhurst was founded in Glasgow in 1902 and this remains our administrative centre. Since then the Firm's capabilities have expanded beyond its **civil and structural engineering** origins into areas such as **water and environmental engineering**, project and facilities management. In-house professionals in fields such as geology, hydrology, biology, chemistry, hydraulic modelling and planning legislation now commonly support our core engineering resources.

Broadwood Loch in Cumbernauld

For over a century Fairhurst has been responsible for the design, management and supervision of engineering projects for clients in a multitude of market sectors.
